

**By far the fastest and easiest decking system you'll ever use!**

The HIDfast way - Using the HIDfast Decker means not only do you stay on your feet, in 3 minutes time you can install 8 deck boards.

**100 square feet = 10 MINUTES**

The old fashion way - Using a screw gun and screws means sore knees and in 3 minutes time installing only 2 deck boards.

Don't use unsightly screws that will rust or pop up and over time cause cracking, splitting and rot.

HIDfast is the fastest, easiest way to get a fastener free surface for a lasting, beautiful appearance. Patented, worry-free, stainless steel fasteners are collated for easy handling and quick loading. Patent pending pneumatic tool delivers precise, consistent, effortless installation.
